

Mohammad Ahmad

Waterloo, Ontario | (519) 778-5464 | mahmad24@uoguelph.ca | [My Website](#)

TECHNICAL SKILLS

- **Languages:** Python, C/C++, C#, Java, JavaScript, TypeScript, HTML/CSS, VHDL, VBA, SQL, R
- **Frameworks & Tools:** React, Node.js, Power BI, Excel (Advanced), Office 365, SharePoint, Unity
- **Software:** MATLAB, AutoCAD, SolidWorks, Adobe Photoshop, Adobe Premiere Pro, Jira
- **Hardware & Systems:** Arduino, Embedded Systems, PLCs, Digital Systems, Robotic Systems
- **Spoken Languages:** Fluent in English and Arabic

EDUCATION

Bachelor of Engineering (Computer Engineering Co-op)

University of Guelph, Guelph, ON September 2022 - Present | Expected Graduation: April 2027

- Relevant Courses: Engineering Design I and II, Object Oriented Programming, Data Structures, Digital Systems, Robotic Systems, Signal Processing, Electronic Devices, Micro and Nano Scale Electronics, Embedded Systems

EMPLOYMENT EXPERIENCE

Cooke & Denison Ltd. - IT Project Assistant (Co-op)

Guelph, ON | January 2025 - December 2025

- Built a two-click, multi-file Excel quoting engine (VBA, SQL, Python) with type-specific machining-time models; auto-generates Word/PDF quotes, logs to a database and refreshes inventory, cutting quoting time from ~2 hours to ~5 mins
- Integrated CNC machine data with Microsoft Business Central/Shop Floor Insight and produced Power BI dashboards for uptime/downtime and order progress
- Automated office workflows (punch in/out reports, supplier purchase requests, ready-to-send quotes) and validated against historical estimates for accuracy and consistency

Youthforce - Team Supervisor

Kitchener, ON | July 2022 - September 2024

- Led a team of seven individuals in the Region of Waterloo's Youthforce program, coordinating landscaping projects across municipal properties
- Redesigned the region's project proposal creation system using Excel to better communicate project vision and speed up the process by 40%, receiving strong feedback from regional management

Mohawk Holdings - Warehouse Manager

Brantford, ON | April 2023 - December 2023

- Designed and implemented a new inventory management system that improved operational efficiency by over 200%
- Supervised and managed five employees with strong leadership that doubled workflow efficiency

PROJECTS EXPERIENCE

Project Blacksite - 2D Game Development

Guelph, ON | November 2025 - Present

- Developing a top-down shooter in C# using Unity, implementing core gameplay systems including player movement, physics-based shooting mechanics, and enemy AI with pathfinding algorithms
- Architected event-driven systems for wave management, health tracking, and game state handling using object-oriented design principles and Unity's component architecture
- Built dynamic UI systems, collision detection, and scene management while applying concepts like object pooling and coroutine-based async operations

Guelph Engineering Competition

Guelph, ON | October 2024

- Collaborated with three peers to design and build an autonomous robot for a competitive robotics challenge
- Programmed robot using Arduino/Python to follow paths, locate and assemble ball components, and deliver to target zones
- Implemented sensor integration (ultrasonic, line-following, etc.) and mechanical systems including gripper mechanisms and precise motor control
- Achieved third place with minimal point gap from first and second place teams

Java Networking Project

Guelph, ON | January 2023 - April 2023

- Collaborated with three peers to develop a networking program for data organization and filtering
- Integrated with external APIs and libraries from provided GitHub repositories to access and manipulate online database resources
- Implemented various filtering and sorting algorithms to process and organize specific datasets
